1. Student account creation: A student creates an account using their GSU email address, verifies their email, completes their profile, and logs in.
2. Invalid account registration: A user attempts to create an account using a non-GSU email address. The system displays an error message and does not activate the account.
3. Browse student businesses: A student opens BENTO, browses available businesses and products, selects a listing, views its photos, description, price, and availability, and quits.
4. Search and filter listings: A student searches for a specific product or service, filters the results by category, price, and location, selects a matching listing, and quits.
5. No matching results: A student searches for a product or service that is unavailable on BENTO. The system displays a message indicating that no listings match the search, and the student quits.
6. Save and manage favorites: A student browses listings, saves a product or service to their favorites, opens their favorites page, removes a saved listing, and quits.
7. Contact a business owner: A student opens a business profile, selects one of its listings, sends the business owner a message asking about the product or service, and quits.
8. Leave a review: A student opens a business profile, submits a rating and written review, views the updated reviews and average rating, and quits.
9. Create a business profile: A verified student logs in as a business owner, creates a business profile with a name, description, category, location, and contact information, uploads a profile photo, and saves the profile.
10. Create and manage a listing: A business owner creates a product or service listing with a title, description, price, photos, and availability. The owner edits the listing information and then removes the listing.
11. Promote a campus organization: A club administrator creates an organization profile, publishes an event with its date, time, and location, and saves the event listing.
12. Join a club or attend an event: A student browses campus organizations and events, requests membership in a club, views event details, and indicates that they plan to attend an event.
13. Report an inappropriate listing: A student finds a suspicious or inappropriate listing, selects the option to report it, chooses a reason, and submits the report. An administrator logs in, reviews the report, and removes the listing if it violates the platform's policies.
14. Unauthorized listing edits: A student attempts to edit or remove a listing owned by another user. The system denies the action and leaves the original listing unchanged.
15. Shopping cart and checkout: A student adds an item to their cart, reviews the items and prices, proceeds to checkout, and completes the payment process.
16. Personalized recommendations: A student saves several listings and browses products and services in their areas of interest. The student returns to the discovery page and views recommendations based on their favorites and browsing activity.
